# Intervention and care for your injured workers

Biron **B**

## Virtual triage in the workplace followed by in-clinic care: a unique solution from Biron

➔ Late diagnoses and absenteeism are expensive.

Disruption of productivity

Extra paperwork

Higher costs for recruiting and training replacement staff

Increased CNESST premiums

Rapid medical intervention following an incident in the workplace, continuous followup of injured workers, along with medical and administrative management, not only reassure your employees, but also help to consolidate your work accident and occupational disease files more quickly and, above all, to reduce your CNESST contributions.

➔ The solution

Ensure that employees who suffer a work-related injury, physical ailment or illness have immediate access to healthcare resources, and that your members receive timely reports and guidance to help reduce the number of events resulting in lost time.

# A network of occupational health professionals ready to respond

Benefiting from our 20 years of experience in specialized occupational medicine services, your injured or ill workers will have access to personalized support from our nursing staff, our network of physicians and our medical imaging services.

- + The right treatment at the right time for injured workers
- + Medical specialists who encourage temporary assignment
- + Faster consolidation of accident records
- + Significant reduction in lost time and costs

## Comprehensive support

Qualified nursing staff to <b>assess the severity</b> of the injury, discomfort or illness	Medical consultation within <b>24 to 48 hours</b> following thenursing staff's assessment
<b>First aid</b> offered in the clinic to avoid unnecessary work stoppages	Real-time translation services in <b>240 languages and dialects</b> (including sign language) for employees who do not speak English or French
Recommendations for <b>self-care</b> , guided by a the nursing staff and adapted to the worker's condition	Properly <b>completed CNESST forms and temporary assignment</b> that allow for rapid assignment to modified work

# → Advantages

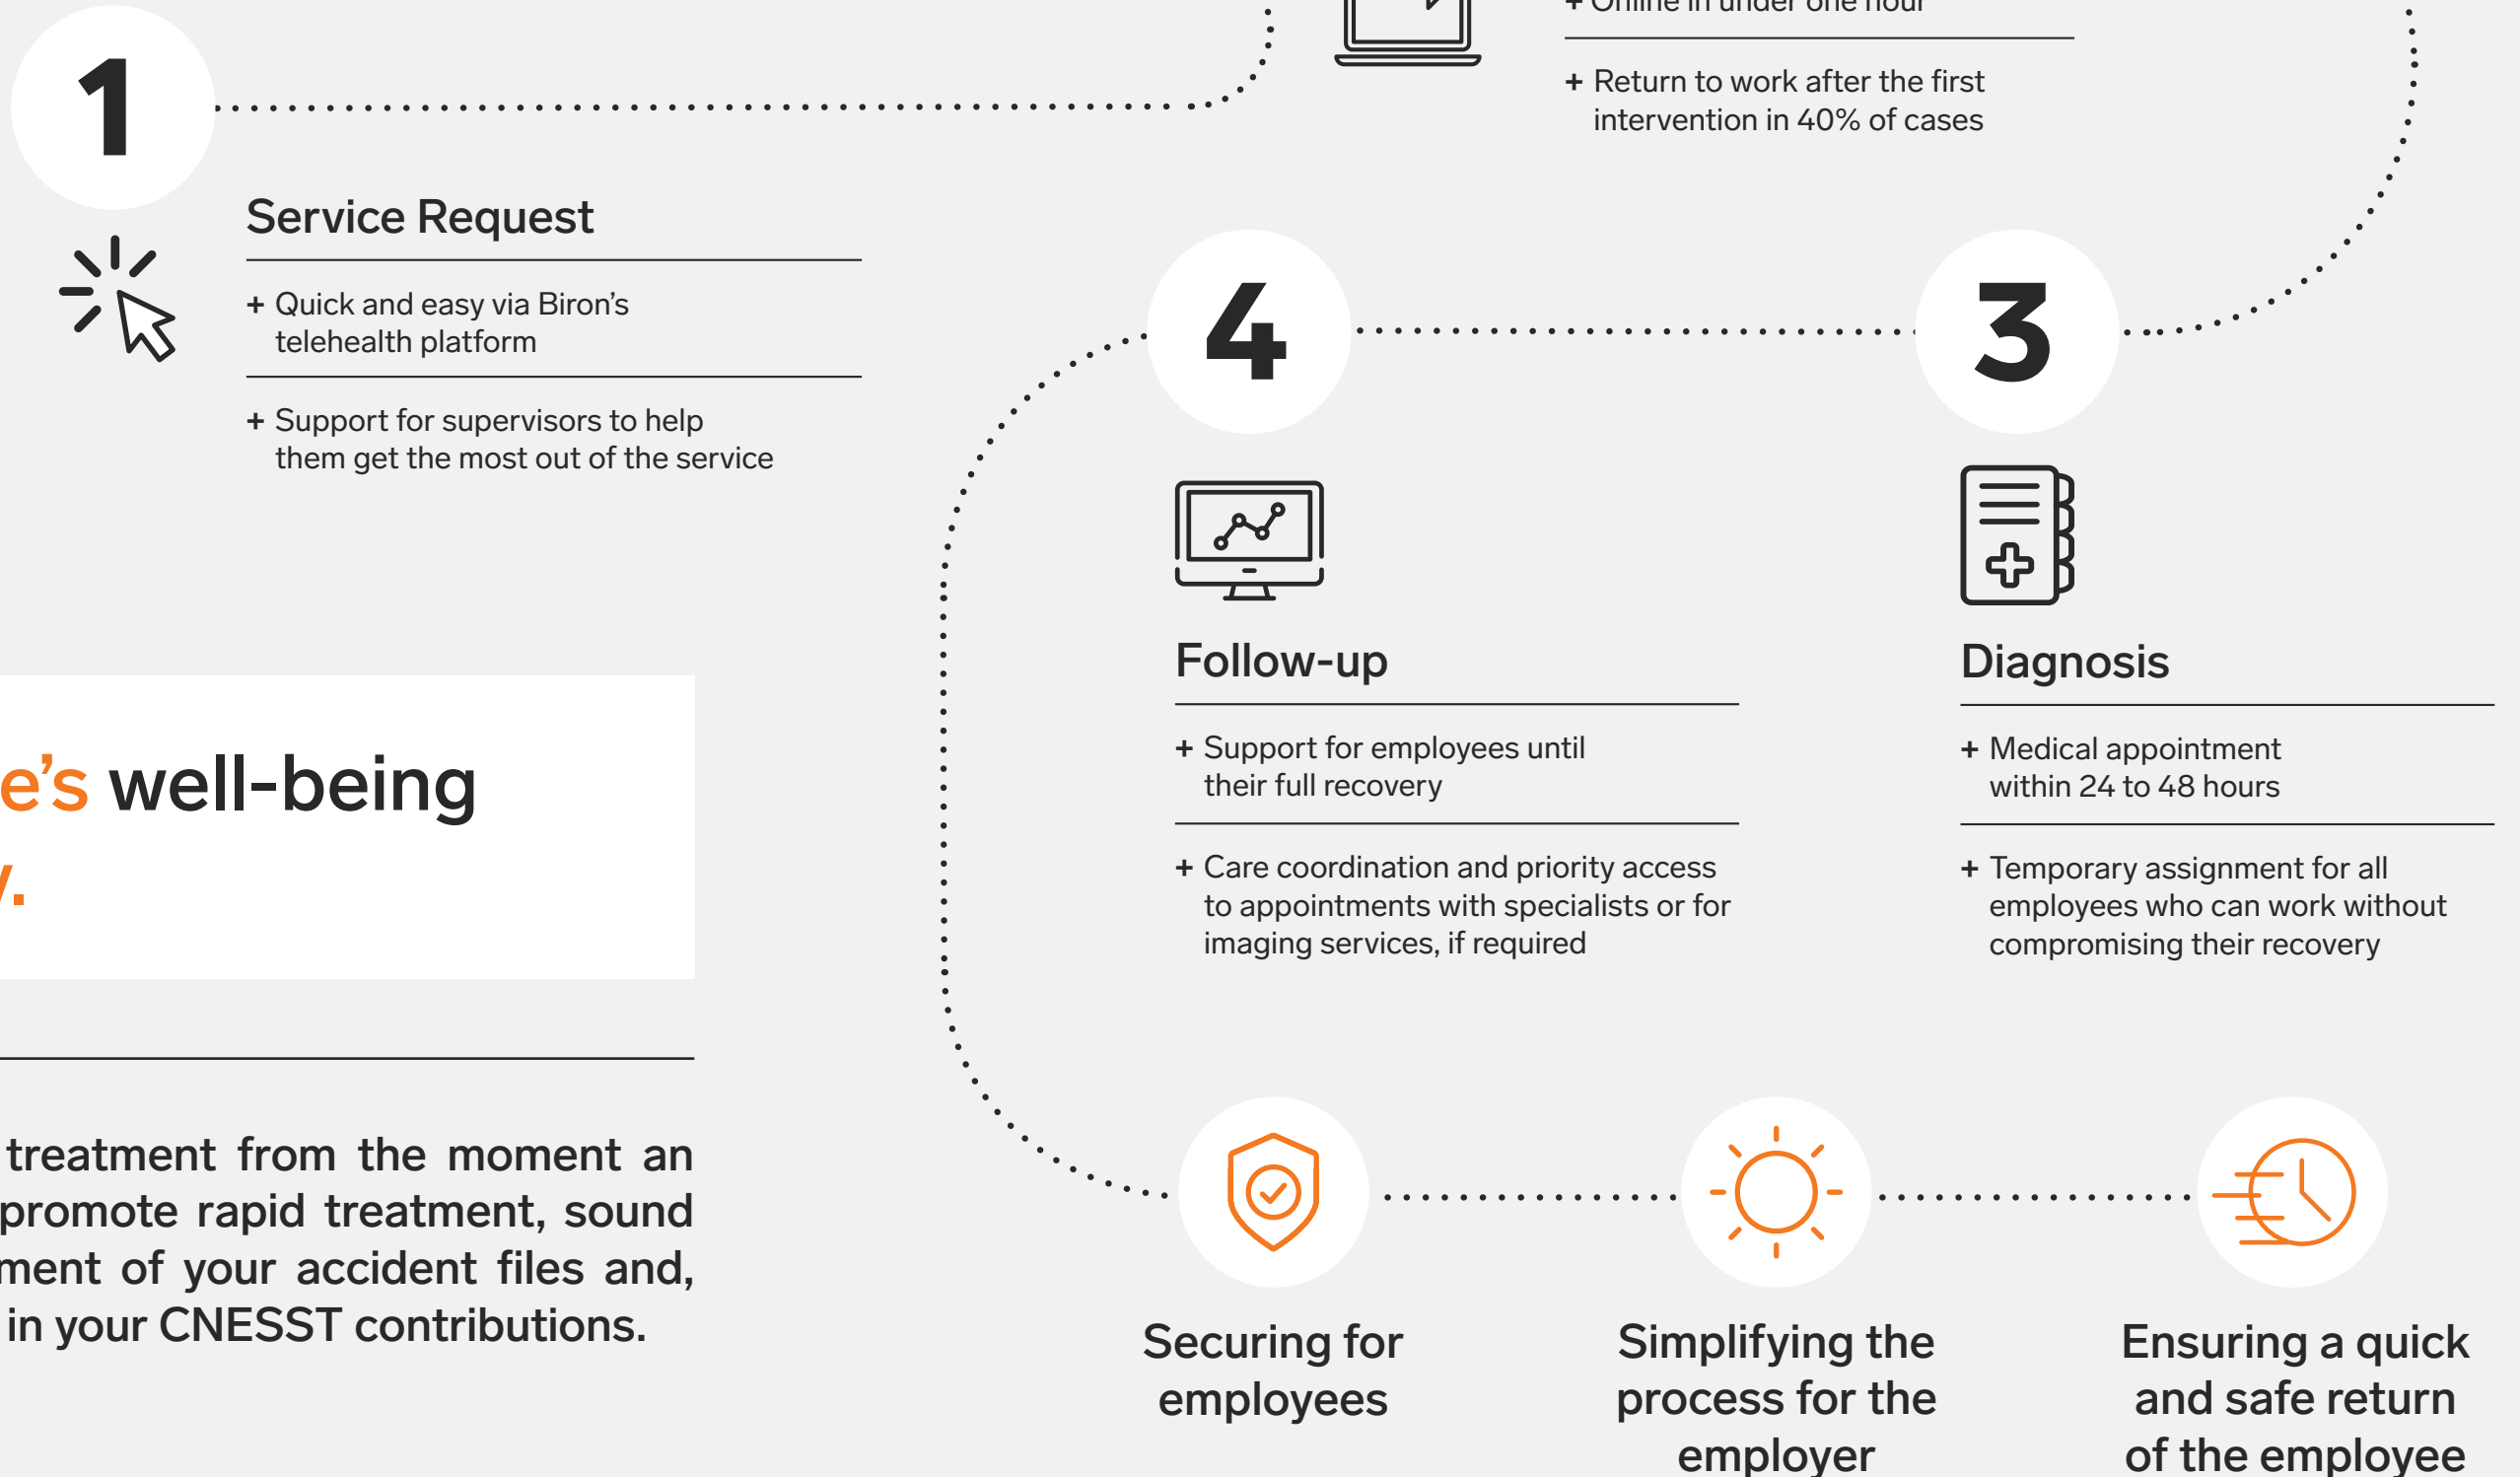

1. By using our services, you will succeed in keeping the intervention at the nonrecordable level of first aid in nearly **40 % of cases involving work-related accidents**, thereby avoiding costly loss of time.
2. In the event of a work stoppage, the physicians at Biron encourage the right treatment as soon as the patient is taken into care, allowing for work acciden records to be consolidated up to **two times faster** than the traditional way.

# → A simple process

The employee's well-being  
is our priority.

By ensuring optimal treatment from the moment an accident occurs, we promote rapid treatment, sound and optimal management of your accident files and, above all, a reduction in your CNESST contributions.

# The Biron experience, everywhere in Quebec

---
